Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 4-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 4, line 3 it is unclear to what element "it" is referring and, therefore, should be replaced by the element to which it refers.

In claim 5, line 15 it is unclear to what element "it" is referring and, therefore, should be replaced by the element to which it refers.

In claim 6, line 14 it is unclear to what element "it" is referring and, therefore, should be replaced by the element to which it refers.

Claim Rejections - 35 USC § 102

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 6 is rejected under 35 U.S.C. 102(e) as being anticipated by Ford.

Ford discloses a horn switch gear comprising a backward moving body

70; a stationary body 46 facing the backward moving body; contact

members 54 and 58 configured to be brought into or out of contact with each other by a forward or backward movement of the backward moving body and retained by the stationary body; the backward moving body comprises a guide for guiding at least one of the contact members by coming with it to bring the contact members into contact with each other when the backward moving body is moved backward from the restored position. The contact member 54 acts as the biasing member interposed between the backward moving body and the stationary body for biasing the backward moving body in a restoring position.

Allowable Subject Matter

4. Claims 1-3 and 7-18 are allowed.
5. Claims 4 and 5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rabagliano et al, Kai et al, Igawa et al, Kikuta et al, and Fujita et al teach various horn switch structures.
